*You will have to buy a separate power supply if you don't want to use PoE for Yealink

Ethernet Speed

If your offices witch provides gigabit speeds, we recommend you choose a phone with a higher ethernet speed.

Power

You have a choice between Power Over Ethernet or AC with a power supply. PoE requires a network switch to power the devices connected to it.

Feature Keys

Each phone comes with several keys that you can customize to suit your business needs.

Headset

You can use a headset with all our phones. Refer to the chart for the outlet types available: RJ9, Bluetooth or USB.
